Programming Skills

Python
Django
Unit Testing
Git/Version Control

Web Dev Skills

HTML/CSS/JSON
Javascript/jQuery
Twitter Bootstrap
Responsive Design

Other Skills

Unix Terminal
Rapid Prototyping
Project Management
MySQL

Projects and Contributions

student_holds

- Built a custom Django-admin command to automate the process of contacting Drew students about registration holds by cross-referencing enterprise and custom databases.

Personal Online Portfolio

- Created a static page with cross-browser compatibility and responsive design. Built with Bootstrap, jQuery and GitHub Pages.

game-grade

- Designed and developed a web application that streamlines code evaluation according to custom unit tests. Work involved Python, Django, Bootstrap, jQuery, LESS, and CodeMirror.
- Troubleshoot and implemented server-side Pylint and unit test evaluation of uploaded files.
- Provided user and technical documentation along with sample tests as tutorials.

Work Experience

Drew University

Madison, NJ

Open Source House Manager

Fall 2013 - Present

- Arranged for the Madison Tech Meetup to take place on-campus for 70+ attendees including local entrepreneurs, Drew students and faculty.
- Managed the development of two computer games built in Python by intro Computer Science students.
- Served as a liaison between Computer Science students and faculty to change the spring course offerings to match more major requirements and preferences in topic.

Freelancer

Fall 2012 - Present

- Designed mockups for features and implemented comment and annotation features on a cost-analysis platform built in VBA.
- Consulted with a non-profit volunteer management center towards cost-effective and scalable web technologies for their site.

Education

Drew University

Graduating May 2014

Double Major in Computer Science and Philosophy
Computer Science GPA: 3.78/4.00
Dean's List | Merit Award Scholarship
